

Winners of the SAUC-E 2006 !!

The VICOROB-UdG^{TEAM} is proud to announce that we have been the winners of the 2006 edition of the SAUC-E competition, hold in the Pinwood Studios in London, during the 3-6th of August 2006. Our team almost doubled the points of the second classified.

The competition

Thursday 3: Arrival to the competition site. Buoyancy adjustments. First tests in the water tank.

Friday 4: Free Training day. Only two teams were able to get into the water: Edimburg and Girona proving their leadership in the competition.

Saturday 5: During the morning the tests continued. At the afternoon the classification took place. Problems with the start button as well as with one of the motors complicated our classification. Even with the problems, our team classified second after the Edimburg team. After fixing the problems, we made a wonderful last minute run during Saturday evening. The robot almost completed the mission.

Sunday 6: The Final. Only 4 teams take part: Southampton, Bremen, Girona and Edimburg. While the first didn't pass the gate, the second passed it but failed to complete the rest of the mission. Our team went through the gate, dropped a marker near the cross and almost impacted the buoy. The robot navigated to the recovery zone but remained there at 1 meter depth without surfacing. Edimburg went after, but a temperature issue didn't allow them to pass through the gate.

ADP S.L.

Team	Performance	Subjective	Weight	Total
Girona	1010	676	-48	1638
Heriot Watt	100	686	61	847
Southampton	100	609	116	836
Bremen	200	463	29,5	692
Glasgow	0	544	87	631
Bath	0	597	15	612
Leicester	0	470	121,5	591,5
